

Lecture 5: Table Configuration on Web Pages

5.1 Basic HTML Table

5.2 Table Cell Features

5.3 Style a Table with CSS

5.1

HTML Table

HTML Table

Name	Birthday	Phone
Jack	5/13	857-555-5555
Sparky	11/28	303-555-5555

Configured with **table**, **tr**, and **td** elements.

Each individual **table cell** is at the intersection of a specific row and column.

Composed of **rows** and **columns** – similar to a spreadsheet.

Tables are used on web pages to *organize* tabular information

Table Elements

<table>

Contains the **table**

<caption>

Describe a **caption** of the table

<tr>

Contains a **table row**

<th>

Contains a **row heading** (header cell)

<td>

Contains a **table data** (data cell)

HTML Table Example

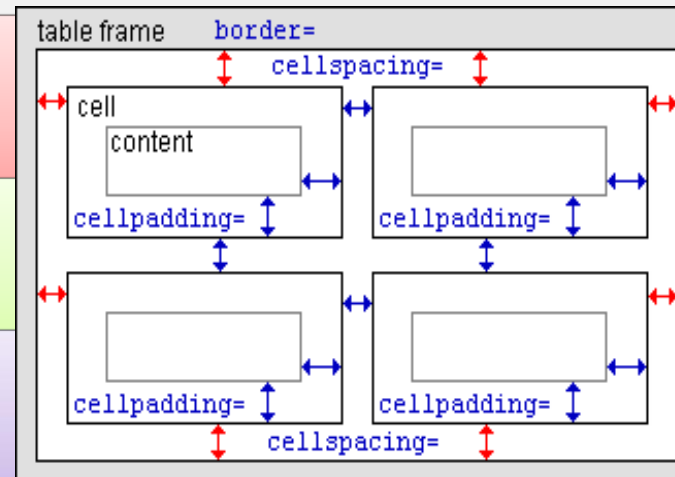

```

<!DOCTYPE html>
<html>
<head><title>Table Example 1</title></head>
<body>
<table border="1">
  <caption> Bird Sightings </caption>
  <tr>
    <th> Name </th>
    <th> Date </th>
  </tr>
  <tr>
    <td> Bobolink </td>
    <td> 5/25/10 </td>
  </tr>
  <tr>
    <td> Upland Sandpiper </td>
    <td> 6/03/10 </td>
  </tr>
</table>
</body>
</html>
  
```

Name	Date
Bobolink	5/25/10
Upland Sandpiper	6/03/10

<table> Element Attributes

<table>

border

Outside border of the table
< table border= "1">

bgcolor

Background color
< table bgcolor="red" >

align

Align left, right, or center
<table align="center">

cellpadding

Create a gap between the cell border and its contents (% allow)
<table border="1" cellpadding="5">

cellspacing

Create a space between the borders of each cell (% allow)
<table border="1" cellspacing="2">

dir

Indicate the direction of text that is used in the table (ltr or rtl)
<table border="1" dir="rtl">

width

Width of the table
<table width="500px" > or <table width="90%" >

<table> Attributes Example

```

<!DOCTYPE html>
<html>
<head><title>Table Example 2</title></head>
<body>
<table align="right" bgcolor= "pink" border="10" cellpadding= "5"
      cellspacing= "2" dir= "rtl" width= "80%">
  <tr>
    <th>Name</th>  <th>Section</th>
  </tr>
  <tr>
    <td>MgMg</td>  <td>A</td>
  </tr>
  <tr>
    <td>MaMa</td>  <td>B</td>
  </tr>
</table>
</body>
</html>

```

Table Example 2	
file:///C:/Users/Administrator/Desktop/assig ...	
Section	Name
A	MgMg
B	MaMa

<tr> Element Attributes

Attribute	Value	Description
align	left	Content in the row is left - aligned.
	right	Content in the row is right - aligned.
	center	Content in the row is centered
	justify	Content in the row is justified.
bgcolor	Color name/ value	Background color of table row

<tr> Attributes Example

```
<!DOCTYPE html>
<html>
<head><title>Table Example 3</title></head>
<body>
<table align="center" border="10" width="50%" cellpadding="50">
  <tr>
    <th>Name</th>  <th>Section</th>
  </tr>
  <tr align="left" bgcolor="pink">
    <td>MgMg</td>  <td>A</td>
  </tr>
  <tr align="right" bgcolor="yellow">
    <td>MaMa</td>  <td>B</td>
  </tr>
</table>
</body>
</html>
```

A screenshot of a web browser window titled 'Table Example 3'. The address bar shows the file path 'file:///C:/Users/Administrator/Desktop/assignment2.html'. The browser displays a table with a thick black border and a cellpadding of 50. The table has three rows: a header row with 'Name' and 'Section', a pink row with 'MgMg' and 'A', and a yellow row with 'MaMa' and 'B'.

Name	Section
MgMg	A
MaMa	B

5.1.1

Lets practice!

According to the table example,

- Create your first table using the table elements such as `<table>`, `<tr>`, `<th>`, `<td>` with your favorite caption using `<caption>`.
- Also add the table attributes to the above table.

You can freely define the contents to your table

Summary

Lecture 5.1: Basic HTML Table

- ✓ HTML Table
- ✓ Table Elements
- ✓ `<table>` Element Attributes
- ✓ `<tr>` Element Attributes
